

Problem

You are given two integers A and B. Your task is to calculate their sum without using the + or - operators.

Use only bitwise operators to compute the result.

Input Format

A B

Constraints

$-10^9 \leq A, B \leq 10^9$

Output Format

Print a single integer representing the sum.

Language

Python 3

```
1 # Enter your code here. Read input from STDIN. P
2 def add(a,b):
3     while b!=0:
4         carry=a & b
5         a=a^b
6         b=carry<<1
7     return a
8 a,b=map(int,input().split())
9 print(add(a,b))
10
```
